## Field Day 2009 Report

June 27th and 28th this year was "Field Day" which is a combination contest and practice of emergency communications. PPRAA, along with the Tri-Lakes Monument Auxiliary, hosted a station at the Tri-Lakes Monument Fire Station #1.

While some things were dropped off on the 26th, most of the setup took place bright and early on the morning of the 27th. Arriving at 8:30 am found one antenna up, with several people at work on three more. Shortly after 10, the GOTA station (AFØS) was up and running, with the digital station (WØTLM) not far behind. Both

stations were on the air with five minutes to spare before the noon start time. The fire department was kind enough to give the group a safety briefing before we got truly started and then followed up their kindness by giving a tour of the station when Boy Scout Troop 248 arrived at 1pm. When it came time to get on the air through the GOTA station, the boys were hesitant to use the radio, but once one of them started calling and even made a contact, they were very eager to keep talking. In the end, each boy made at least two contacts, with a few making three or more.

Around 5pm, the stations had to shut down for lightning, and the groups took the opportunity to grab some dinner provided by PPRAA.

Everyone enjoyed the break and the brisket before getting back to work around 7pm. The site shut down for the night around 2 am on the 28th.

While the first attendees on the 28th showed up at 5am, the station was not up and running till 7am or so. Again, it was another eventful morning, with breakfast supplied by PPRAA. By 11am, the group had begun to break down some of the antennas and by 1pm, everything was cleaned up and stored away, just waiting for the next event.

## Thursday Evening Net

Please join us for the Thursday Night 10-meter net. We meet at 7:00 PM (Local) on or near 28.400 USB.

The goal of the net is for Technicians through Extra class operators to enjoy a weekly on-the-air chat, and experiment with various transmission modes. The outcome of the net has been a surprise to new

old old-timers alike, we has all come away with a better understanding of our radios, filter usage, mic gain, transmission line, ...etc.

This is a perfect net for an introduction to HF and/or SSB too. The net is informal, just jump in with your call and net control will get you on the list. One thing that is (almost) always is giving a description of you rig, antenna system and approximate location.

Technicians remain operating SSB as do other class operators with SSB only radios. If you are restricted to SSB do not let that bother you as we take that into account even as we jump between modes (AM, FM, DSB, LSB).

Hope to hear you Thursdays on the net!

WØRO
